

# Epic Ambulatory Implementation

**Challenge:** Expedite the implementation of Epic ambulatory systems across all specialties at three major medical centers for a large academic organization.

## Success Factors

**Best Practice | Knowledge | Experience.** Leveraging extensive experience with large-scale EHR implementations, the Ballista team worked collaboratively with the project team to create a standardized, scalable approach for implementing various specialties within the client's condensed timeline.

### Approach

Created a discovery, design, and configuration process grounded in governed clinical standards to ensure timely implementation. Developed test strategy using strict entrance/exit criteria.

### Outcomes

Achieved a successful go-live on schedule and under budget with minimal issues, establishing an operational process for ongoing governance of clinical content.

40+ specialties

5,000+ Providers

On-time & under budget
