

Clinical Trial Management System - OnCore Data Migration

Challenge: Manage the data migration efforts for a large multi-facility CTMS implementation project to meet an impending oncology grant renewal

Success Factors

Best Practice | Knowledge | Experience. Using deep acumen on large-scale healthcare projects, Ballista created a cohesive strategy ensuring executive leadership visibility, organization and accountability. A data migration strategy, plan and approach outlined a path forward to meet a quickly approaching deadline.

Approach

Implemented project requirements for minimum footprint, source data field mapping & translation, data prep, post migration clean-up, QA plan & automated migration tools.

Outcomes

Leading migration teams, ensuring complete data review & entry with proper quality assurance; grant deadline was achieved meeting regulatory & reporting requirements.

Coordinated across **60+** teams for data validation.
Managed **10+** teams for data entry, review & Quality Assurance

3,000+ Protocols with IRB, DSMC/DSMB reviews, SRC approvals & Investigational Drugs/Device data

45,000 subjects migrated successfully
