

# SharePoint Intranet Upgrade and Standardization

**Challenge:** Retire hundreds of non-supported SharePoint platforms across a large multi-facility healthcare organization and establish standards for future use.

## Success Factors

**Best Practice | Knowledge | Experience.** Applying deep technical analytical skills, excellent organization and an ability to communicate and engage with large numbers of stakeholders, the Ballista project manager developed and executed a strategy to upgrade SharePoint emphasizing standardization to ensure future supportability.

### Approach

Completed current state analysis of intranet platform usage. Guided diverse group of stakeholders in developing site standards. Created comprehensive communication plan ensuring adoption.

### Outcomes

Despite numerous stakeholders across a diverse landscape, old SharePoint platform & servers were retired. New sites came on-line with minimal issue. Project was completed under budget and on time.

Over **20,000** policies archived for permanent retention saving resource time & expenses

Over **200** SharePoint site owners involved across 12 months

Evaluated, replaced & retired **593** sites
