CONSULTING | Right on target.

Epic Clinical Implementation

Challenge: Implement Epic inpatient and ambulatory clinicals across large cancer consortium in partnership with academic organization

Success Factors

Best Practice | Knowledge | Experience. Applying clinical and revenue cycle experience with large scale EHR implementations, the Ballista team led an implementation of Epic modules in support of Oncology, Research, Ambulatory, Pharmacy, HIM, Radiology, Cardiology, Inpatient and Procedure Suite departments.

Approach

Guided the organization on best practice strategies for EHR implementations using Ballista's deep vendor and care delivery knowledge. Partnered with client's teams to ensure success.

Outcomes

Despite pandemic challenges, the organization successfully went live with minimal issues and extremely satisfied stakeholders.

33 specialties brought live across **5** facilities

2600 users trained

0% reduction in charges during go-live
